

Photo Clock Face

Have you given any thought to making your own personalized clock faces?

This clock is several years old. It holds up well even though the conditions are not favorable for such things. High humidity hasn't effected it much as it hangs in the bathroom.

Imagine what you could do. You don't need to have numbers!

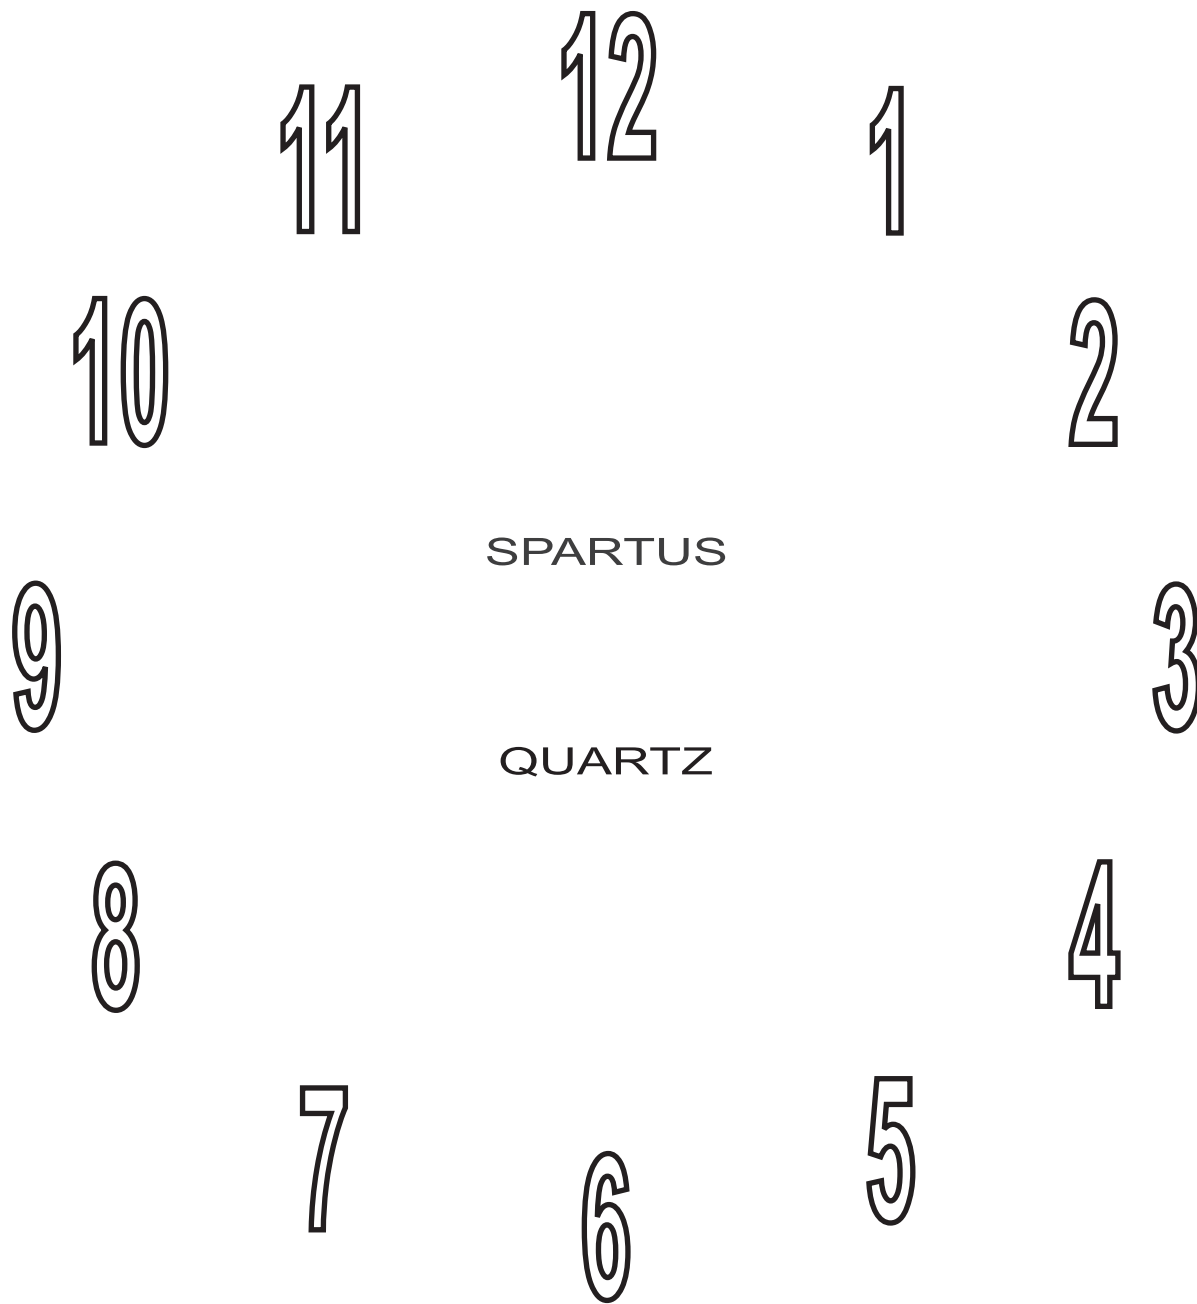

Simply print the photo of your choice on photo paper. Cut it to fit and mount it in the clock with double-sided tape if you like.

I suggest making a test fit with a sheet of plain paper or cardboard. Transfer that to the printed photo.
