

HEXAGON PATIO BLOCK FORMS

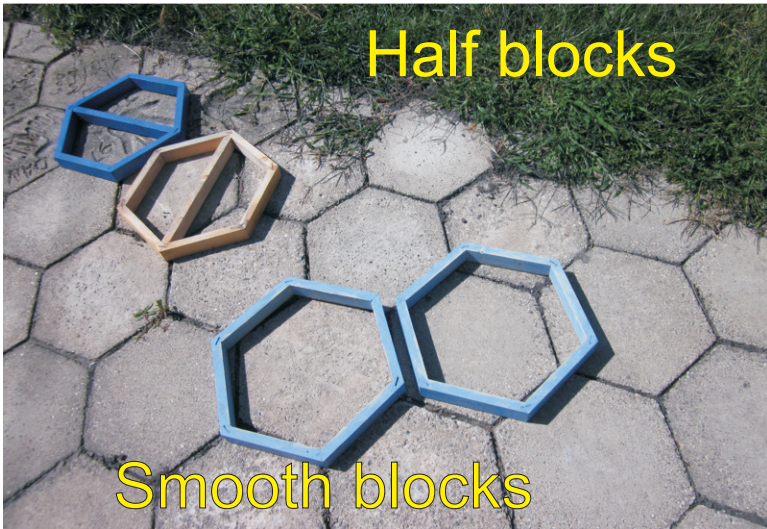

Nuts. The grass needs cut again.

Welcome to the walk of fame

Hand prints and art

Half blocks

Smooth blocks

Squirrel-go-round's
huge hexagon

Bird feeder's
huge hexagon

These forms are always at the ready when I decide to change or expand the walks. Forms are 3/4 x 1-1/2" deep but you can make them deeper. The center divider is removable or make several and leave it in as I did. Blocks are glued and painted. Wet them before use. Use a stiff mixture. Trowel cement into the forms, working the tool up and down to remove trapped air and force cement into corners. Finish with a smooth or notched trowel. I used both.

You can make wooden patterns for impressions. Many of the smooth blocks have tulip and leaf impressions on the underside. I have used this method for many years. Designs or hand prints make a trip hazzard.
